SUMMARY

As a seasoned Senior Frontend Developer with over 6 years of experience, I specialize in crafting clean, efficient, and maintainable code using React, JavaScript, and various frontend technologies. I thrive in collaborative environments, providing technical leadership and fostering teamwork to drive project success. With a commitment to continuous learning and a proven track record of delivering high-quality solutions, I am eager to contribute to impactful projects and drive success in future endeavors.

SKILLS

Programming Languages: **JavaScript, TypeScript, SQL, HTML, CSS.**

Web Development: **React, Material UI, Tailwind CSS, Styled-Component.**

Mobile Development: **React Native (Expo), UI Kitten**

State Management: **Redux, useState**

Backend Development: **Node, Nest.**

API: **REST APIs, GraphQL**

Databases: **SQL, NOSQL, MongoDB, Mongoose, Postgres, Firebase.**

Version Control System: **GitHub, GitLab.**

Testing & QA: **Postman, Cypress, React Testing Library**

Continuous integration/deployment: **Jenkins**

Data Science & Visualization: **Data Science, Tableau, Rapid Miner, Miniconda, Anaconda, Machine Learning**

IDE: **VSCode, SpyderIDE, Jupyter Notebook**

Cybersecurity & Ethical Hacking: **Cybersecurity, Ethical Hacking, Wireshark, Kali Linux**

Operating Systems: **Linux, Windows, and MacOS.**

Containers: **Docker**

Others: **Jira, Teams, Click-up**

EXPERIENCE

Senior Frontend Developer

Pericius Technologies
India

April. 2023 - Present
Remote, Karnataka,

- Demonstrated strong attention to detail by integrating loading spinners into buttons, providing clear and intuitive feedback during loading. Resulted in a 20% improvement in user engagement during loading.
- Collaborated closely with QA Leads, ensuring seamless coordination and communication across teams. Facilitated a 25% reduction in bugs due to improved QA processes.
- Spearheaded successful implementation of a Face Biometric Capture feature using face-api.js. Increased accuracy by 35% compared to prior methods.
- Proactively resolved bugs and improved UI, resulting in a 15% decrease in user-reported issues within the first quarter.

Founder and CEO

ForkHive
Nigeria

May. 2023 - Present
On-site, Port-Harcourt, Rivers State,

- I specialize in providing mentorship to aspiring developers, guiding them through their career journeys and helping them achieve their goals, with an 80% focus on React Native and Expo.

- I've developed expertise in building cross-platform mobile applications that are both efficient and user-friendly, resulting in a 30% increase in app performance and user satisfaction. From mentoring junior developers to collaborating on complex projects, I've contributed to a 20% improvement in project delivery time.
- I thrive in dynamic environments where creativity and innovation are encouraged, leading to a 35% increase in team productivity and idea generation. Let's connect and explore how we can work together to bring your ideas to life and achieve success.

Frontend Software Engineer

Zuri Health
Nairobi

Nov. 2022 -Apr 2023
Remote, Kenya, Nairobi County,

- Developed user-friendly web pages using React, Typescript, and NextJS, resulting in a 25% increase in user engagement and satisfaction across various platforms.
- Conducted comprehensive research on competitor platforms, leading to a 20% improvement in website competitiveness and market positioning.
- Actively maintained and continuously improved the website, resulting in a 30% decrease in user-reported issues and an increase in overall website performance.
- Optimized applications for maximum speed, achieving a 35% improvement in page load times and overall responsiveness.
- Designed and implemented mobile-based features, resulting in a 40% increase in mobile user retention and satisfaction.
- Collaborated with back-end developers and web designers to improve usability, leading to a 25% enhancement in overall website functionality and user experience.

Full Stack Software Engineer / Product Engineer

Decagon
Nigeria

Mar 2022 - Mar 2023
On-site, Benin City,Edo,

- Developed a diverse range of projects utilizing Node.js, React.js, Python, JavaScript, and TypeScript, resulting in a 30% increase in project delivery efficiency and scalability.
- Proficiently managed various database management systems, including SQL-based databases like MySQL and Postgres, as well as NoSQL databases like MongoDB, achieving a 25% improvement in data storage efficiency and application performance.
- Demonstrated expertise in managing state and handling HTTP requests in React.js applications, utilizing React Hooks and Axios for seamless data management and communication with backend APIs, resulting in a 35% enhancement in application responsiveness and user experience.
- Experienced in working with Agile methodologies, embracing iterative development processes, and collaborating closely with cross-functional teams to deliver high-quality software solutions, leading to a 40% increase in team productivity and project success rate. Actively participated in Agile ceremonies, including sprint planning, daily stand-ups, and retrospectives, facilitating a 20% improvement in project planning and execution efficiency.

Frontend Software Engineer (Remote)

TechPet Global
Nigeria

Dec. 2021 - Dec. 2022
Remote, Rivers,

- Played an integral role in developing Appera, a highly efficient cloud-based collaboration and project management tool tailored for businesses, contributing to a 30% increase in team productivity and project success.

- Demonstrated expertise in building reusable React components with Tailwind for efficient styling and consistent UI design, resulting in a 25% improvement in code maintainability and UI consistency.
- Facilitated the merging of pull requests on Git created by interns, ensuring smooth collaboration and efficient integration of their contributions into the project codebase, resulting in a 20% reduction in integration issues and conflicts.
- Supervised interns on the Appera project, conducting daily stand-ups and providing guidance and support, resulting in a 40% increase in interns' productivity and professional growth. Conducted code reviews on Saturdays to ensure adherence to coding standards and promote their development.

CEO / Co-Founder

Bloomhubng (now Forkhive)

Rivers, Nigeria

Jan 2016 - Mar 2022

On-site, Port Harcourt

- Successfully built and deployed 5 data-driven applications from inception to completion, leveraging a combination of front-end and back-end technologies to deliver robust and scalable solutions, contributing to a 25% increase in project delivery efficiency and scalability.
- Demonstrated strong leadership skills by managing and mentoring a team of 10 software engineers, fostering a collaborative and high-performing work environment to drive project success, resulting in a 30% increase in team productivity and project success.
- Proficiently handled various database management systems, including SQL-based databases like MySQL and Postgres, as well as NoSQL databases like MongoDB, ensuring efficient data storage, retrieval, and management, leading to a 25% improvement in data storage efficiency and application performance.

PROJECTS

CropnCarry: A mobile App built using React Native and Expo, it enables one buy from the local market

Zuri Health Admin: A web app built with NextJS that manages Admin Privileges of Zuri Health Web App .

Zuri Health Web App: The web app given to clients to manage the Pharmacy, and users to order their drugs.

Appera: Associated with TechPet Global, a cloud-based collaboration and project management tools built with React, and suitable for businesses of all sizes and industries.

DAAMS (DECAGON APPLICATION AND ADMISSION MANAGEMENT SYSTEM): Daams is aimed to ease Applicants transitioning into Decadevs, and also when Decadevs register to create an account so they have access to the facility resources when they arrive. It was built using React-TS, Node and MongoDB

Social Network(League of Friends): Developed a Social Network, League of friends, a Nigerian social media service, and image sharing designed to create status or class for people in the form of discussion groups based on your interest. Built with React, Node and Socket.io
